

Jonathan Quinn

Zurich, Switzerland | Swiss, Canadian, German | jonfquinn@proton.me | +41 78 690 78 62 | github.com/jofras | jofras.github.io

EDUCATION

ETH Zurich

BSc in Computer Science

Zurich, Switzerland | Sep 2022 – Aug 2025

GPA: 5.2 / 6.0

- Thesis: Detected ASR hallucinations corrupting 2% of podcast episodes; built preprocessing pipeline for 2.3B tokens
- Coursework: ML, Deep Learning, Probability & Statistics, Numerical Methods, Digital Circuits, Information Retrieval

Purdue University

Exchange Program, College of Science

West Lafayette, IN, USA | Aug 2024 – Dec 2024

GPA: 3.8 / 4.0

- Built 3D graphics pipeline from scratch in C++ (rasterization, lighting, texture mapping, real-time OpenGL shaders)
- Extended Xinu OS with priority scheduling, memory management, and file system implementation in C

University of Zurich

BSc in Biology

Zurich, Switzerland | Sep 2021 – July 2022

GPA: 5.1 / 6.0

- Coursework: Genetics, Cell Biology, Neuroscience, Statistics with R, Organic Chemistry; pivoted to CS for computational depth

WORK EXPERIENCE

Research Intern

Universitätsklinikum Mannheim

Mannheim, Germany | June 2026 – July 2026 (planned)

- Building machine learning pipelines for patient data analysis and clinical decision support systems

Signals Intelligence Operator & Driver

Swiss Armed Forces

Jassbach, Switzerland | Jan 2026 – Present

- Monitor military frequencies; drive platoon of 30+ recruits under lieutenant command

Infrastructure Software Developer

Service informatique de l'Entité neuchâteloise (SIEN)

Neuchâtel, Switzerland | Sep 2025 – Dec 2025

- Achieved 33x speedup (3hr → 5.5min) on network scanner, enabling hourly scans for 1,800+ devices
- Built full-stack diagnostics app (Python, Laravel, MySQL) used by 50+ engineers; reduced troubleshooting from minutes to seconds
- Designed human-centered UI with seasonal effects and custom birthday views to make network tools feel alive

RESEARCH EXPERIENCE

Lost in Transcription: Embeddings from ASR Transcripts

Rycolab (ETH Zurich) – Supervised by Prof. Ryan Cotterell & Dr. Alexander Hoyle

Bachelor's Thesis | Feb 2025 – Aug 2025

- Discovered ASR hallucinations overwriting genuine speech in 2% of podcast episodes using hash-based fingerprinting
- Architected end-to-end pipeline for 50GB corpus: parallelized preprocessing, PostgreSQL quality control, HPC cluster training
- Revealed "semantic divergence" between podcast and news media organizing same 2020 events into different realities
- First large-scale gender bias analysis of podcast media; found traditional stereotypes persist alongside novel associations

SKILLS, AWARDS & ACTIVITIES

Programming

Python (PyTorch, scikit-learn, SpaCy, NLTK, NumPy, Pandas), SQL, Java, C/C++

Tools, Systems & Frameworks

Git/GitHub, Linux, Docker, Laravel/PHP, React/Next.js, SLURM

Languages

English (native), German (native), Swiss German (native), French (proficient)

Awards & Activities

- 2nd place, ETH x Optiver Hackathon (2024)
- Winner, Michigan State Triathlon (2024)
- Ironman Finisher (2025)
- Laureate, Annual Literature Showcase
- Captain, GCK Lions Hockey (2016–2021)

Interests

Triathlon, Trail Running, Ice Hockey, Music Production, Guitar, Reading
